Ali Ahmad Taha

Mobile app developer

Beni Suef |+201015023441 | Ali.Ahmad.dev26@gmail.com|Linkedin | Github

Summary

Junior Flutter Developer and Computer Science graduate with a solid foundation in Flutter development, mobile app architecture, state management (BLoC/Cubit), REST API integration, and responsive UI/UX implementation. Familiar with clean architecture principles, and collaborative software development. Passionate about writing clean, maintainable code, improving app performance, and building scalable, user-friendly cross-platform applications.

EDUCATION

Bachelor of Computer Science, Beni Suef University — Sept 2022 - Jul 2026
IT department

KEY PROJECTS

Examify

AI-Based Exam Management System | Capstone project

- Enabled students to view upcoming and past exams and check grades.
- The app supports two roles, Instructor and Student, each with their own dedicated home screen and navigation flow determined at login via JWT token claims.
- Instructors can monitor student performance reports and track exam results directly from the app.
- Students can join the exam with a unique exam code generated by the system.

Tools : Figma , VS code , Swagger , Github
Project repo on github : https://github.com/Quiz-Monitor/Mobile-App.git

Quran Plus

A crafted Flutter application for reading the Holy Quran, tracking prayer times, and reciting daily Athkar.

- Flutter-based Quran app with surah navigation and quran reading experience
- Implemented Athkar, prayer times (API based), and city search features
- Applied state management, API integration (Dio), and local storage (SharedPreferences)

Tools: Figma , VS code , Postman , Github
Project repo on github : https://github.com/Ali-Ahmad-0/My-Quran.git

SKILLS

Mobile App dev: Flutter , Dart , State management(BLoC/Cubit) , Dio , REST APIs integration

Architecture : Clean Architecture , MVVM , Repository pattern , Dependency injection

Local Storage : Shared preferences , Hive , Flutter secure storage

Dev Tools : Git , Github , Postman , Swagger , Android Studio , VS Code , AWS Console , MS SQL Server

CS Core: OOP , SOLID Principles , Networking basics , AWS Cloud basics , Databases , Problem Solving

CERTIFICATIONS & TRAINING

- Cloud services management and operation - NTI (National Telecommunication Institute) — October 2026
- ITI Flutter summer training, ITI (Information Technology Institute) — July 2024
- Flutter advanced BLoC and MVVM pattern, Udemy — July 2025
- Complete Flutter and dart development course, Udemy — April 2025
- Deep dive into clean architecture, Udemy — September 2025
